

# HRMTEC's 123 Schleifenprofi VX embossing machine – compact, user-friendly and cost-saving – Ribbon Printing 2.0

**HRMTEC's computer-aided embossing prints all ribbon materials and colors, easy to use, with high print quality and significant cost savings**

Zug – May 23, 2018

---

HRMTEC's 123 Schleifenprofi VX embossing machine is the only computer-aided embossing machine, which prints the wreath ribbons with hot embossing. HRMTEC is the only company in the market that owns this technology. The system was developed exclusively for the ribbon printing and is fully industrial suitable. Due to the complete in-house development of HRMTEC, the system is independent of major manufacturers. The production of the 123 Schleifenprofi VX embossing machine is ISO 9001:2000 certified, and the device is CE certified.

HRMTEC offers a wide range of metallic and non-metallic printing foils, which is processed by the 123 Schleifenprofi VX embossing machine. Particularly noteworthy is the high-precision metallic embossing in gold and silver. The high-precision non-color embossing (black and white), are further characteristics of the 123 Schleifenprofi VX embossing machine.

The 123 Schleifenprofi VX embossing machine prints all common materials on the market (cloth, paper, film / plastic). All common types of ribbons (satin, super satin, moiré), all common paper types (paper ribbons, paper wreath ribbons, parchment paper), and all common types of plastic (poly ribbons, foil ribbons) can be used. Additionally, all popular types of decorative ribbons can be printed.

The 123 Schleifenprofi VX embossing machine processes ribbon widths from 20 mm - 252 mm.

The printing foil is only used in the printable area and is not carried in the area which is not to be embossed. This results in an enormous cost saving for the embossing, which is unique in the market.

## Product Announcement

In addition, the 123 Schleifenprofi VX embossing machine is characterized by the simplest operation and handling.

The 123 Schleifenprofi VX embossing machine is software-independent, which means that the device can be controlled with the most ribbon printing programs available on the market.

The printer driver of the 123 Schleifenprofi VX embossing machine runs on Windows 64-bit operating systems (Windows 7, Windows 8, Windows 10, etc.).

The 123 Schleifenprofi VX embossing machine is also compact with the dimensions 575x320x235mm (LxWxH).

HRMTEC offers with its embossing realistic digital ribbon printing system not only the system with the outstanding print quality and the lowest printing costs, but offers customers the complete ribbon printing portfolio of products to services.
